

Wide Ride II+

Featuring Serta®
Cool Action™ Gel
Memory Foam in
the Cushion

WE HAVE REDEFINED SEATING COMFORT AGAIN

- Exclusively featuring Serta® Cool Action™ Gel Memory Foam, the first infused with the support and cooling touch of Serta® MicroSupport™ gel to help you through the day
- More adjustments than ever before including air powered bolsters, front and rear cushion tilt, and our must have, exclusive BackCycler® system... all added to help you get personalized fit and comfort for the long hauls you make
- Larger 23" seating area puts the "wide" back into the Wide Ride name, giving you the room to operate
- New wider isolating scissor suspension with adjustable damper delivers smooth, stable, comfort down those rough highways buffering your body from the abuse they deliver

Wide Ride II series seats have a smart part number system. Use the chart above and to the right to build the part number for the seat you desire. Part numbers have a base (7 digits) with a dash and then trim code (3 digits). The table above shows the options available for the base part number. Once that is determined, use the trim chart to the right to determine the trim desired and complete the part number.

EXAMPLE: 5300111-N02 is a Wide Ride II with standard suspension, hi back, driver swivel, heater, and both arms in red-tan two-tone ultra leather.

Arm rests can be ordered separately. Arm rests are interchangeable left & right. Use base part number 1234480 plus dash "-" and trim code per chart to the right to order arm(s).

The Wide Ride II is the worthy successor to the Wide Ride series. With it we have redefined premium seating for professional drivers again, just like we did with the Wide Ride. The new wider 23" seating surface, isn't just larger, it also contains a totally new feature like you have never before seen in truck seating. We have partnered with Serta and have incorporated their Cool Action™ Gel Memory Foam into the seat cushion. The leader in seating together with the leader in mattresses together to give you a best in class ride that you just cannot find anywhere else.

We did not stop at the cushion with new features. We have incorporated our exclusive BackCycler® system which has been proven to reduce back pain and strain, so you can keep running all day and then get up and do it again the next. When it is turned on, BackCycler® slowly inflates and deflates continuously to keep your back moving slightly, preventing the stiffness and pain from sitting still.

We could have stopped there, but we kept adding in everything we could to bring you the most comfortable and adjustable seat we could. Other key changes include air bolsters in the back and cushion, which enable you to adjust how much "hug" the seat gives your body. A new rear cushion tilt adjustment has been added to the front cushion tilt, giving you the ability to get the right sitting angle for your body type. Like our Pro Ride and Patriot series seats, the Wide Ride II features an adjustable position cushion to provide proper thigh support, fold flat capable recline, dual chamber air lumbar, and optional 17" long adjustable arm rests. Finally, we've added a new towel bar track adjustment handle makes adjusting the track position easier than ever before. So much is new you just have to go see it to believe it.

The Wide Ride II series like all Bostrom seats are proudly made in the USA
