

## FOR EXTREME DUTY APPLICATIONS

### FEATURES:

- **3/4" grade 8 hardware:** Increased durability for long hauls and high vibration environments
- **3/4" A36 steel bracket plates and the reinforced cylinder bracket:** A 17% thicker bracket when compared to our standard duty product along with a reinforced cylinder support extends the life of the mounting components
- **Brass cap style arm pivot:** Utilizes two brass caps to increase bearing life at the critical pivot point within the chain set arm assembly
- **1/2" stop bolt:** Adds strength to extend the lift of the arm stop
- **Enlarged angle joint section:** Increases the cross section of the load handling area which provides greater vibration tolerance
